FULLSTACK WEB DEVELOPER

Hello, I'm Patryk Szram

I have over a decade of experience in the field of web development. I focus on designing and developing responsive web applications tailored to the business needs of clients. My expertise includes application architecture, developing application structures, choosing optimal technologies, and implementing solutions to ensure the productivity and performance of applications. I design strategies to streamline processes related to the deployment and development of applications. Additionally, I possess skills in designing graphics for publication and web design based on knowledge of the latest UX/UI trends.

As a Fullstack Web Developer with proficiency in JS/TS, SASS/LESS, PHP/SQL, I have versatile experience in the web development and e-commerce sectors. I am a dedicated, fast-learning self-learner. I understand best programming practices, prioritize business goals, and meet client project requirements. I am always open to new challenges. I love soccer and am a proud father of two wonderful children.

SKILLS

- Working in Scrum/Agile
- Understanding business goals
- Adapting to new technologies
- Planning scalable architecture
- Ensuring app quality and testing
- Empathy in team relationships
- Proactive efficiency seeking
- Independence and initiative
- Creativity in problem-solving
- Ability to learn quickly
- UX/UI interface design

TECHNOLOGIES

- JavaScript/TypeScript
- Angular/Vue
- PHP/SQL
- HTML/SASS/LESS
- Rest API/Web Workers
- PWA/SPA
- LINUX/OS X
- Docker/GIT

TOOLS

- Google Cloud Platform
- Firebase/Vercel
- Photoshop/Illustrator
- Webpack/Babel
- CI/CD
- NODE/NPM

Experience

Raiffeisen Bank International AG in Warsaw, Poland

3 years, 8 months

PRESENT

Senior Frontend Developer

In my role, I was responsible for maintaining and developing an internal CRM web application for internal bank employees to serve clients from across Europe. This involved ensuring the highest quality of application code, designing and implementing solutions in collaboration with UX designers. I consistently focused on achieving a minimum 80% unit test coverage for the entire source code of the application.

JUN 2021

JUN 2021

Frontend Developer

Before starting in this role, I possessed only theoretical knowledge of the technology. Proficient knowledge of the Angular framework, NgXS, and a comprehensive understanding of Material Design system concepts were essential for the position. Handling all project-related tools was crucial in meeting all requirements and achieving the business goals necessary for a promotion in the role.

MAY 2020

STABILIS.IO® in Warsaw, Poland

1 year, 5 months

MAY 2020

Lead Frontend Developer

I was responsible for the complete technological transformation of web applications. I oversaw the transformation process, actively participated in technology selection, strategy planning, and recruitment processes. I rewrote applications from Polymer to the Vue framework while maintaining total integrity. I designed an application for drawing graphs based on BPMN 2.0 standards. This tool enabled the creation of optimized processes, significantly improving the efficiency of production halls for one of the leading manufacturers in the construction and metallurgical industry in Poland.

NOV 2018

MoveCloser in Warsaw, Poland

1 year, 8 months

NOV 2018

Senior Fullstack Developer

I was responsible for overseeing project teams, with a primary focus on ensuring high-quality code delivery and efficient collaboration. As a team coordinator, I ensured coherence in technology selection and the effectiveness of team activities. I actively organized training sessions aimed at standardizing developers' approaches, eliminating errors, and enhancing the team's skills. My duties included comprehensive coordination throughout project implementation, from preparing the team environment to production deployment.

MAR 2017

Coderabbit in Warsaw, Poland

1 year, 4 months

MAR 2017

Fullstack Developer

In my role as a Fullstack Developer in self-employment, I was responsible for the entire organizational process of projects. This encompassed designing architecture, implementation, deployment, and direct communication with clients. My responsibilities covered both technical and relational aspects, ensuring comprehensive project support. I prioritized efficiency, high-quality code, and client satisfaction through close collaboration and transparency in the project implementation process.

NOV 2015

Flash-Media in Gdansk, Poland

4 years

NOV 2015

Web Developer

I had the opportunity to design, create, and maintain numerous web projects. My skills encompassed PHP, HTML, CSS, and JavaScript, and my work demonstrated professionalism and a commitment to quality in every project. Collaborating with graphic tools such as Photoshop and Illustrator, I developed eye-catching and practical solutions. Working at Flash-Media was a significant milestone in my career as a web developer, as it allowed me to gain valuable experience in designing and building various web projects while enhancing my programming and user interface design skills.
