As an experienced Full Stack Web Developer, I apply my skills in creating and maintaining user-friendly, high-performance web applications. With a goal-oriented approach, I bring a strong commitment to collaboration and solutions-oriented problem-solving. My expertise includes **TypeScript/JavaScript, PHP/SQL, CSS/SASS, Angular/Vue, Laravel/WordPress, Docker/Virtualbox**, all underpinned by a deep understanding of UX practices. This blend of skills enables me to align technology effectively with business objectives, driving innovative solutions.

I am deeply passionate about process automation and excel at solving real-world problems in web development. My focus on collaborative and innovative solutions comes from being a fast-learning self-starter who always prioritizes business goals. I am eager to contribute to mission-driven teams and am driven by my passion for developing innovative web solutions.
